

P-BILLING

Microsoft Teams Billing System

Customizable, scalable and efficient solution for Microsoft Teams that can trace all PSTN calls and calculate their cost

What is P-Billing for Microsoft Teams?

P-Billing is a billing system for Microsoft Teams that is built to fulfill organizations that are using Microsoft Teams with all the reports and information related to calls cost for their external PSTN lines. It's developed using Microsoft technologies to capture Microsoft Teams calls and store their information into a database and generate reports based on this information and calculate the cost for each call according and can be used by the accountant and financial departments.

Why customers use PAIS Billing System

- Trace outgoing PSTN calls cost and locations
- Rich ready and customizable reports according to the business needs
- Identify calls destination and provide insight for the behavior of the users
- Help the organizations with business decisions and strategies that can decrease their cost and enhance their business productivity

Compatibility

- Supports Microsoft Teams Direct Routing
- Supports all certified Microsoft Teams Session Boarder Controller (SBC)
- Hosted in Microsoft Azure or deployed on-premises
- Integrated with Microsoft Teams and Microsoft Graph API

Value

- Calls cost can be different for each SBC, depending on the tariffs for PSTN lines connected to each SBC
- Role-Based Access Control (RBAC)

Cost Tracking

- Identify and analyze organizations external calls
- Help organizations with business decisions for cost management
- Helps to fully migrate to Microsoft Teams as a full PBX

Microsoft Teams Billing Solution provided by PAIS Group has allowed us to gain more visibility on the users calls behavior and equipped us with rich, powerful and user-friendly tool which is very advance comparing to our old billing solution.
